INTRODUCTION

The HEOS Link is part of the HEOS wireless multi-room sound system that enables you to enjoy your favorite music anywhere and everywhere around your home. By utilizing your existing home network and the HEOS app on your iOS or Android™ device, you can explore, browse, and play music from your own music library or from many online streaming music services.

- True multi-room audio - play different songs in different rooms or the same song in every room
- Utilizes your existing home wireless network for quick and easy setup
- Industry leading microsecond audio synchronization between HEOS device
- Legendary Denon audio quality

If you are in a hurry, you can be enjoying great sounding music in no time by following the steps outlined in the HEOS Quick Start Guide (packaged with your HEOS device).

Please continue reading this Owner’s Manual for more detailed information about the features and benefits of your HEOS Link.
BEFORE YOU BEGIN

NOTE
If you have already installed at least one HEOS device, please skip to the section “ADDING MORE HEOS DEVICES” below (p. 17).

System Requirements
Before you begin installing your first HEOS device, please make sure you understand and meet a few basic requirements.

**Network Requirements**

**Wireless Router** - In order to use your HEOS music system, you should have a working wireless (Wi-Fi) network in your home. If you do not have a wireless network, please contact your local Denon dealer or electronics retailer to assist you with purchasing and installing a wireless network in your home.

The HEOS Extend Wireless Range Extender (sold separately) is available as an accessory, should you need to setup a new wireless network or extend the range of your existing network. Please contact Denon for more information about the Wireless Extender.

**High Speed Internet Connection** - HEOS accesses the Internet to stream music to your home from many popular online music services. HEOS is also designed to provide you with software updates, which are delivered via your home Internet connection. DSL, Cable, and Fiber services will provide the best experience and reliability. You may experience performance issues with slower Internet connections like satellite based services.
Controller Requirements
You can control your HEOS wireless multi-room sound system using the free HEOS app on any iOS or Android mobile device that meets these minimum requirements:

iOS Minimum Requirements
- iOS version 5.0 or later
- iPhone® 3GS or newer
- iPad®
- iPod touch® (3rd generation) or newer

Android Minimum Requirements
- Android OS version 2.3 or later
- All resolutions
### Getting To Know Your HEOS Link

Unpack your HEOS Link from the box and verify that the following items are included:

1. **HEOS Link**
2. **Quick Start Guide**
3. **Safety Information Sheets**
4. **Warranty** (North America model only)
5. **Extended Protection Plan** (North America model only)
6. **Audio/Setup cable**
7. **RCA cable**
8. **Ethernet cable**
9. **Power cord**
10. **IR Direct cable**
11. **IR Emitter Cable**

**NOTE**

Please use the power cord included in the box for your device.
Front panel

Status LED

Please refer to the “Status LED Table” for LED color and state meaning “Status LED Table” (p. 46).
**Controls**

1. **Volume Up/Down buttons (+, –)**
   Adjusts the HEOS Link’s volume level up or down.

2. **Mute button ( setattr)**
   Mutes or unmutes the HEOS Link’s volume.
• Back panel

1. Reset Button (RESET)
   Various settings are reset to the factory default values. (p. 44)

2. IR Output (IR OUT)
   Used to control a Denon AVR, PMA, or System. (p. 36)

3. Trigger Output (DC12 V 150 mA MAX.)
   Used to send a 12 V signal to control an external amplifier. (p. 37)

4. Digital Audio Output (COAXIAL OUT)
   Used to connect this unit to audio amplifier, AV receiver of audio system. (p. 13)

5. Digital Audio Output (OPTICAL OUT)
   Used to connect this unit to audio amplifier, AV receiver of audio system. (p. 13)

6. Digital Audio Input (OPTICAL IN)
   Used to connect audio devices with a digital optical cable. (p. 14)

7. USB Input (USB 5 V/1 A)
   Used to connect USB storage devices. (p. 14)

8. Network Connector (NETWORK)
   Used to connect this unit to a wired Ethernet network. (p. 17)

9. AC input (AC IN)
   Used to connect the power cord. (p. 15)

10. Analog Pre Output (PRE OUT)
    Used to connect this unit to audio amplifier, AV receiver of audio system. (p. 13)

11. Subwoofer Output (SUB WOOFER)
    Used to connect this unit to a powered subwoofer. (p. 13)
12 Analog Line Input (LINE IN)
   Used to connect audio devices with a stereo RCA cable.
   (p. 14)

13 AUX Input (AUX IN)
   Used to connect audio devices with a 3.5 mm cable. (p. 14)

13 Connect Button (CONNECT)
   Used for Wi-Fi setup.

13 Connect in Status LED
   Indicates the status of this unit. (p. 46)
Placing Your HEOS Link

The HEOS Link is designed to add HEOS multi-room audio functionality to an external device which offers audio amplification. You should place your HEOS Link in a convenient location near the amplification device you are connecting it to.

- The HEOS Link must be within range of your wireless network.
- The HEOS Link is not waterproof. Do not place it near any water source and do not leave it outside in the rain or snow.
Connecting External Devices

- **Connecting to an Amplifier or AV Receiver**
  Connect the PRE OUT, COAXIAL OUT, or OPTICAL OUT output to an available input on your amplifier or AV receiver using the appropriate cables.

- **Connecting to a Subwoofer**
  Connect the SUB WOOFER output to an input on your powered subwoofer or your subwoofer amplifier.
### Connecting an Audio Playback Device

Connect the LINE IN, AUX IN or OPTICAL IN input to an audio playback device (CD player, portable music player, etc...) using the appropriate cables.

### Connecting a USB storage device

Connect a FAT32 formatted USB mass storage device containing digital music files to the USB port.
**Powering Your HEOS Link**

Connect the power cord included in the box to the back of the HEOS Link and the plug to a wall outlet.

For North America
(AC 120 V, 60 Hz)

For Europe
(AC 220 - 240 V, 50/60 Hz)

**Getting the HEOS App**

The HEOS app is the heart of the HEOS experience. Using your mobile device and the HEOS app, you can setup, browse, explore, and control your HEOS system right in the palm of your hand, from anywhere in your home.

Download the HEOS app for iOS or Android by searching App Store™ or Google Play™ store for “HEOS by Denon”.

![App Store](image1.png)  
![Google Play](image2.png)
SETTING UP YOUR FIRST HEOS LINK

Once you have placed your HEOS Link in your listening room and have downloaded the HEOS app, you are ready to configure your HEOS Link for music playback. This involves following a few simple steps to get the HEOS Link connected to your existing home network:

**Caution**

DO NOT connect the Ethernet cable if you are connecting your HEOS Link to a wireless network. If you are connecting the HEOS Link to a wired network, use an Ethernet cable to connect the HEOS Link to your network or router.

1. Make sure your mobile device is connected to your wireless network (the same network you want your HEOS Link connected to). You can check this in the Settings - Wi-Fi menu of your iOS or Android device.

   **NOTE**
   
   If your wireless network is secure, make sure you know the password to join your network.

2. Make sure you have the included Audio/Setup cable handy.

3. Launch the HEOS app on your mobile device.

4. Tap the “Setup Now” button at the top of the screen.

5. Follow the instructions to add the HEOS Link to your wireless network. (The Wi-Fi settings from your mobile device will be copied to the HEOS Link via the audio cable.)

   **NOTE**
   
   If you have any problems connecting your HEOS Link, jump to the Troubleshooting section (See p. 41).
ADDING MORE HEOS DEVICES

The HEOS wireless multi-room sound system is a true multiroom audio system that automatically synchronizes audio playback between multiple HEOS devices so that the audio coming from different rooms is perfectly in sync and always sounds amazing! You can easily add up to 32 devices to your HEOS system.

Adding Wired HEOS Devices

Just connect the HEOS devices to your home network using an Ethernet cable and the HEOS devices will appear on your HEOS app as a new room in the Rooms screen.

At your convenience, you can assign a name to the HEOS devices to indicate which room you have it placed in.

- Use only a shielded STP or ScTP LAN cable which is easily available at electronics stores (CAT-5 or greater recommended).
- Do not connect a Network Connector directly to the LAN port/Ethernet connector on your computer.

Adding Wireless HEOS Devices

You can add additional wireless HEOS devices to your HEOS system by selecting “Add Device” from the HEOS app’s settings menu and follow the instructions:
Using Your HEOS Link

Once you have your HEOS Link connected to your network and the HEOS app installed on your mobile device, it’s easy to start enjoying your favorite music. You can listen to something different in every room or the same music perfectly synchronized in all rooms. It’s up to you!

Selecting a Room

If you have more than one HEOS Link, you must tell the HEOS system which one you want to control:

1. Tap the Rooms tab.
2. Select the Room you want to control.
3. Select the Music tab to select a music source or the Now Playing tab to control what is currently playing in the selected room.
Listening to Radio

The HEOS system includes access to more than 70,000 free internet radio streams from all corners of the globe via the TuneIn radio service. Just select the TuneIn logo from the main Music menu and browse among the 70,000 stations neatly organized into popular categories and select a station that appeals to your mood.

NOTE

If you have a TuneIn account, you can sign into the TuneIn service under Settings - Music Sources - TuneIn, and access all of your “My Favorite” TuneIn stations.

Playing music stored on your mobile device

1. Tap the “Music” tab.
2. Select “This iPhone/iPod/iPad/Phone”.
3. Browse the local music on your phone and select something to play.
Playing music from an external audio device

1. Connect an external audio device to the digital optical, analog RCA stereo or analog 3.5 mm stereo input on the back of the HEOS Link.

2. Select “AUX Input” from the Music tab.

3. Select the name of the HEOS Link to which you connected the audio device in step 1.

4. Select the name of the input to which you connected the audio device in step 1.

5. Initiate playback on the audio device.
Streaming an external audio device to any HEOS device

The sound from the audio device can be played directly on the selected device or digitized and sent over your network to other HEOS devices.

1. Connect an external audio device to the digital optical, analog RCA stereo or analog 3.5 mm stereo input on the back of the HEOS Link.
2. Select “AUX Input” from the Music tab.
3. Select the name of the HEOS Link to which you connected the audio device in step 1.
4. Select the name of the input to which you connected the audio device in step 1.
5. Initiate playback on the audio device.
Playing music from a USB device

1. Insert a FAT32 formatted USB device into the USB port on the back of the HEOS Link.
2. Select “Local Music” from the Music tab.
3. Select the name of your HEOS device.
4. Browse the music on your USB device and select something to play.

NOTE
- It may take several minutes for the name of your HEOS Link to appear in the Local Music list if you have a large number of files on your USB device.
- It is not possible to connect and use a computer via the USB port of this unit using a USB cable.
HEOS account

What is a HEOS account?
A HEOS account is master account or “keychain” for managing all of your HEOS music services with one single username and password.

Why do I need a HEOS account?
With the HEOS account you just have to enter your music services login names and passwords one time. This allows you to easily and quickly use multiple controller apps on different devices. You just log into your HEOS account on any device and you will have access to all of your associated music services, play history and custom playlists, even if you are at a friend’s house listening to music on their HEOS system.

Signing up for a HEOS account
You will be instructed to signup for a HEOS account the first time you try to access any music service from the main Music menu of the HEOS app.

Changing Your HEOS account
1. Tap the Music tab.
2. Select the Settings icon in the upper left corner of the screen.
3. Select “HEOS Account”.
4. Sign Out, Edit, or Remove your HEOS account from your HEOS system.
Playing from Streaming Music Services

A Music Service is an online music company that provides access to vast music collections via free and/or paid subscriptions. Depending upon your geographical location, there are several options to choose from. For more information about which services are available in your area please visit HEOSbyDenon.com.

Adding a Music Service
Once you’ve setup your HEOS account, you can add supported Music Services to your HEOS system by tapping on the music service logo in the Music tab.

Follow the instructions on the screen to add your username and password for the selected music service. You only have to enter your account information once as the HEOS account service will securely remember your login information so you don’t have to enter it each time you want to play music from the music service.

Additional Music Services may be available under Settings - Music Services.

Changing Music Service Settings

1. Tap the “Music” tab.
2. Select the Settings icon in the upper left corner of the screen.
3. Select “Music Sources”.
4. Select the name of the online Music Service you want to edit.
5. Sign out, then sign in again to associate your username and password with your HEOS account.
6. Select “Hide for Now” to prevent the service logo from appearing on the main Music menu.
Listening To The Same Music In Multiple Rooms

The HEOS system is a true multiroom audio system that automatically synchronizes audio playback between multiple devices so that the audio coming from different rooms is perfectly in sync and always sounds amazing!

You can easily add up to 32 devices to your HEOS system. You can join or group up to eight individual rooms into a group that functions as if they were a single room.

Grouping Rooms

1. Tap the “Rooms” tab.
2. Press and hold your finger on room that is not playing music.
3. Drag it into the room that is playing music (indicated by the red outline) and lift your finger.
4. The two rooms will be grouped together into a single device group and both rooms will be playing the same music in perfect sync.
Ungrouping Rooms

1. Tap the “Rooms” tab.

2. Press and hold your finger on room that you want to remove from the group.

   **NOTE**
   You can not remove the first room that started playing the music before grouping.

3. Drag it out of the group and lift your finger.

4. Music will stop playing in the room you dragged out of the group but will continue playing in any remaining rooms.
Grouping All Rooms (Party Mode)
You can easily group the eight rooms together into Party Mode by using a “pinch” gesture.

1. Tap the “Rooms” tab.
2. Place two fingers on the screen over the list of rooms.
3. Quickly pinch your two fingers together and release.
4. All of your rooms will be joined together and begin playing the same music in perfect sync.
### Ungrouping All Rooms
You can easily ungroup all of your rooms and exit Party Mode by using a “spread” gesture.

1. Tap the “Rooms” tab.
2. Place two fingers close together on the screen over list of rooms.
3. Quickly spread your two fingers apart from each other and release.
4. All of your rooms will be ungrouped and music will stop playing in every room (except the original “master” room that was playing before you grouped the rooms together).
Using the Now Playing Queue

HEOS uses a Now Playing “Queue” to line up music that you want to listen to. Music can be selected from any of your local or online music sources (as long as they are not preprogrammed “radio” or “station” type streams). This feature works similarly to how a jukebox works. You select something to play (a song, album, playlist or even your entire music collection) and add it to the “queue”. When you select something to play you will be asked how you want to queue up your music.

- **Play Now**
  - Inserts the item into the queue after the currently playing track and plays the selected item immediately.

- **Play Now & Replace Queue**
  - Clears the queue and plays the selected item immediately.

- **Play Next**
  - Inserts the item into the queue after the current song and plays it when the current song ends.

- **Add to End of Queue**
  - Adds the item to the end of the queue.

### Repeat and Shuffle Playback

You can control how the play queue plays the music that you have added by using the Repeat and Shuffle controls. The playback controls are visible on the Now Playing screen.

1. Tap the “Now Playing” tab.
2. Tap the cover art to reveal the repeat ⏯️ and shuffle ⚡ controls.

---

**Contents**
- Setup
- Use
- Troubleshooting
- Status LED

29
Rearranging the Now Playing Queue

Once you have songs lined up in your queue, you might want to rearrange the order or remove some songs:

1. Tap the “Now Playing” tab.
2. Tap the Queue icon in the upper right corner of the screen.
3. Tap the Pencil icon to enter Edit mode.
4. Rearrange the order of your queue by dragging the list icon (on the right side of each track row) up or down.

Deleting Songs from the Play Queue

You can remove songs one at a time from the Now Playing queue:

1. Tap the “Now Playing” tab.
2. Tap the Queue icon in the upper right corner of the screen.
3. Tap the Pencil icon to enter Edit mode.
4. Tap the track(s) that you want to delete.
5. Tap the Delete icon to delete all of the selected tracks from the play queue.
Deleting All Songs from the Play Queue
You can remove all of the songs from the Now Playing queue:

1. Tap the “Now Playing” tab.
2. Tap the Queue icon in the upper right corner of the screen.
3. Tap the Delete icon to confirm that you want to delete all songs from the queue.

Saving Playlists
You can save the Now Playing queue as a HEOS Playlist that you can recall later. The new playlist will be available from the Playlists button on the Music tab on every controller app connected to your HEOS system.

1. Tap the “Now Playing” tab.
2. Tap the Queue icon in the upper right corner of the screen.
3. Tap on the Save icon.
4. Enter a name for your Playlist and tap the Save icon.
MAKING ADJUSTMENTS

You can adjust specific settings for each of your HEOS Links in your system:

1. Select the Settings icon located in the upper left corner of the main Music menu to display the Settings menu.
2. Select “My Devices” to display a list of your devices.
3. Select the HEOS Link you want to adjust.

Changing the Name of a HEOS Link

1. Select “Name”.
2. Select or enter a new name for your HEOS Link.
3. Select the Save button to save your changes.

Changing the Wireless Network Connection

1. Select “Network”.
2. A list of wireless networks that your HEOS Link can access is displayed.
3. Select the network you want your HEOS Link to join.
4. Wait as the HEOS Link’s network connection is changed.

NOTE

Wired networking is automatically selected when the device is connected to a wired Ethernet network. To switch back to using a wireless network you must remove the Ethernet cable from the back of the device.
Adjusting the Equalizer

1. Select “EQ”.
2. Adjust the Treble or Bass up or down.

Select the Reset button to restore the default settings.

Adjusting the Volume Control Method

1. Select “Line Out Level”.
2. Select Fixed to lock the volume at the optimal level or select Variable to control the volume from the Now Playing screen.

Adjusting the Audio Quality

Selects the transcoding option for rebroadcasting audio from one HEOS device to another HEOS device (or group of devices) across the network. When set to “Normal”, high bit rate audio sources originating from the first device (such as AUX input, WAV, FLAC and PCM) will be transcoded to ensure the highest level of reliability for the audio stream.

1. Select “Quality”.
2. Select Normal (default) or High.

- If you have selected High and you experience audio dropouts when streaming sources from one device to other devices, please select Normal (default).
- This setting does not affect the AUX input when played on the connected device by itself (there are no other devices grouped to it), in which case the original source quality and bit rate are maintained and there is no inherent delay.
Advanced Settings

Caution
Adjusting these settings may disconnect your device from your network and possibly render your device unusable. Do not use these features unless you are comfortable making advanced adjustments.

■ Network Settings
1. Select “Advanced”.
2. Select “Network Settings”.
3. Scroll down to see all of the options for
   a. Network Interface (wired or wireless)
   b. Wireless network settings
   c. Manual or static IP address for your device
4. Select Save Settings to apply the new settings or Cancel Changes to revert to the previous settings.

■ Firmware Upgrade
1. Select “Advanced”.
2. Select “Firmware Upgrade”.
3. Enable or disable automatic firmware upgrades.
4. Manually check for a firmware upgrade.
5. Select Save Settings to apply the new settings or Cancel Changes to revert to the previous settings.
About
Viewing Technical Details About the HEOS device.

1. Select “Advanced”.
2. Select “About”.
3. Scroll down to see information about the device’s
   a. Hardware
   b. Software
   c. Device
External Device Control

The HEOS Link can tightly integrate with most Denon AVR, Preamps, and Hi-Fi systems to allow them to operate as if they were one device. You can configure your HEOS Link to tell the connected device when to turn on, turn off, select the correct input and adjust volume and mute. You can adjust specific settings for each of your HEOS Links in your system:

1. Select the Settings icon located in the upper left corner of the main Music menu to display the Settings menu.
2. Select “My Devices” to display a list of your devices.
3. Select “Control”.
4. Select the method which is most appropriate for your configuration:

- **IR Control**
  Connect the appropriate IR control cable between your AV receiver or amplifier and the HEOS Link using the IR direct or IR emitter cable (both included) depending on the IR control input capabilities of your device.

**NOTE**
Connecting the IR control cable (IR Direct cable/IR Emitter cable) to the Trigger Out connector of the HEOS Link incorrectly may break the connected AV receiver, the amplifier or the IR Emitter cable.
- **Trigger Control**

If the power amplifier to be connected to this unit has a trigger input connector, connect it to the TRIGGER OUT jack of this unit using the included IR Direct cable. A signal up to 12 V/150 mA is output from the TRIGGER OUT jack.

![Diagram showing connection between power amplifier and unit]
UPDATING YOUR SYSTEM

HEOS has the ability to add enhancements and updated functionality via your high speed Internet connection. When such updates become available, you will be notified when you open the HEOS app. Follow the instructions on the screen to update the HEOS device and/or your controller App.

In the event that you wish to manually initiate an update, please follow these steps:

1. Select the Settings icon located in the upper left corner of the main Music menu to display the Settings menu.

2. Select “Check for Update”.

3. Follow the instructions on screen to install any available updates to your HEOS system.
ADVANCED FEATURES

There are a few advanced features of the HEOS system that you may want to explore once you become familiar with the basic operations. You can access the advanced features of the HEOS system by following these steps:

1. Select the Settings icon located in the upper left corner of the main Music menu to display the Settings menu.

2. Select “Advanced Settings” to display a list the available settings.

Submit Diagnostics

If you are having trouble with your network or HEOS system, you may be asked by Denon technical support personnel to select this option. This feature will automatically send Denon technical support diagnostic information about your HEOS system.

NOTE

No personal information is sent and your information will never be shared with anyone.
Sharing Music from your Mobile Device

The HEOS App has a feature called “Music Sharing” which can share the local music stored on your mobile device to other HEOS app users on your local network. To enable this feature, select Music Sharing, and set it on “ON”.

The name of the device you are sharing from will appear as a new Local Music source allowing other HEOS controller apps to browse and play music from the your device.

Resetting Your Controller App

This feature will reset the control app to its original state when you first installed it on your mobile device without requiring you to remove, download, and reinstall it from the app store.

Power Modes

- **Network Standby**

  To save power, the device will automatically enter “Network Standby” whenever there is no network access or playback for 20 minutes and will automatically resume to full power whenever the device is selected and playing music. There is no visible indicator or LED that will show that the device is in Network Standby as it is a fully automatic function.

- **Deep Standby**

  The device also has the ability to automatically enter “Deep Standby” whenever the wired or wireless network connection is removed for more than 60 minutes in Network Standby. The front panel LED will turn off during Deep Standby. To “wake” a HEOS device from Deep Standby, you must press the volume or mute buttons which will immediately turn on the front panel LED.

- **Off**

  To completely turn off the power to the device you must remove the mains plug from the power outlet.
BASIC TROUBLESHOOTING

My HEOS Device won’t connect to my network using the audio cable

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Make sure your mobile device is connected to your wireless network before setting up your device.</td>
<td>16</td>
</tr>
<tr>
<td>• Alternatively, you can connect your device to your network router using the included Ethernet cable. Once connected via Ethernet, the HEOS by Denon App should recognize the device and you can manually move it to your wireless network using Settings/My Devices/Device_Name/Advanced/Network Settings.</td>
<td>17</td>
</tr>
</tbody>
</table>

I get a message “Device was not found”

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Move your HEOS device closer to your wireless router.</td>
<td>12</td>
</tr>
<tr>
<td>• Your HEOS devices and controller device may not be on the same network. Verify that the controller device is on the same network as your HEOS devices. This is usually configured under the Settings feature on your mobile device. If you have more than one network, your mobile device may hop to a different network as you move around your home.</td>
<td>16</td>
</tr>
<tr>
<td>• Make sure you don’t have any other electronic devices interfering with your wireless network signals. Microwave ovens, cordless phones, and some televisions can cause wireless network interference.</td>
<td>12</td>
</tr>
<tr>
<td>• If your HEOS devices are located far away from your router, consider adding a Wireless Range Extender like the HEOS Extend.</td>
<td>5</td>
</tr>
<tr>
<td>• In case your wireless router is incompatible with HEOS device, please use the optional HEOS Extend Wireless Range Extender and hard-wire it to your router.</td>
<td>5</td>
</tr>
</tbody>
</table>
### I can't control an external device via IR and Trigger

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Check the control cable connection between HEOS Link and the AV receiver or amplifier.</td>
<td>36</td>
</tr>
</tbody>
</table>

### I don't hear anything from the Link

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Check the connection between HEOS Link and the AV receiver or amplifier.</td>
<td>13</td>
</tr>
<tr>
<td>• Check that the correct input source is being used for the AV receiver or amplifier.</td>
<td>–</td>
</tr>
<tr>
<td>• Check that HEOS Link and the AV receiver or amplifier are at a suitable volume.</td>
<td>–</td>
</tr>
<tr>
<td>• Check that the external device connected to HEOS Link is connected and playing correctly.</td>
<td>14</td>
</tr>
</tbody>
</table>

### Music cuts out or delays sometimes

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Make sure your Internet connection is operating correctly. If you are sharing your network with other users or devices, they may be using most of your bandwidth (especially if they are streaming video).</td>
<td>5</td>
</tr>
<tr>
<td>• Make sure your HEOS devices are within range of your wireless network.</td>
<td>5</td>
</tr>
<tr>
<td>• Make sure your HEOS devices are not located near other electronic devices that could interfere with it’s wireless connectivity (like microwave ovens, cordless phones, TVs, etc…).</td>
<td>5</td>
</tr>
</tbody>
</table>
### I hear a delay when using the AUX Input with my TV

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you are connecting the AUX input with your cable or satellite box for enjoying TV audio through multiple HEOS devices, you may hear a delay between when you see someone speak and when you hear the audio. This is because the HEOS system must buffer the audio before it sends it out to the HEOS devices so that it arrives at all devices at the same time. You can avoid this delay by listening only to the device which is directly connected to the set top box.</td>
<td>20</td>
</tr>
</tbody>
</table>

### Connecting to a WPS Network

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>If your wireless router support WPS (Wi-Fi Protected Setup™) your HEOS wireless device can optionally connect to your network using the “Push Button” method by following these steps: 1. Press the WPS button on your router. 2. Within 2 minutes, Press and Hold the Connect button on the rear panel of the HEOS device for 5 seconds. 3. The LED on the front of the device will flash green for several seconds as it connects to your WPS router. 4. When the connection is complete, the LED on the front of the device will turn solid blue.</td>
<td>5</td>
</tr>
</tbody>
</table>
### Resetting Your HEOS Device

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resetting your HEOS device will clear out the wireless network info, EQ, and name but retain it's current software. You will have to use Settings - Add Device to reconnect the HEOS device to your home network before it can be used. To reset your HEOS device, gently insert a small paperclip into the Reset button hole on the back and hold it in until the front LED begins to flash amber.</td>
<td>–</td>
</tr>
</tbody>
</table>

### Restoring the HEOS Device to Factory Defaults

<table>
<thead>
<tr>
<th>Solution</th>
<th>Refer to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Restoring the HEOS device to its factory defaults will clear all of the settings and restore the original software which was installed at the factory. <strong>Caution</strong> All settings will be erased and the software will likely be downgraded! To restore your HEOS device to the factory defaults, unplug the power cable from the power outlet. Insert a small paperclip into the Reset button hole on the back of the HEOS device, reconnect the power cable, and hold it in until the front LED begins to flash amber.</td>
<td>–</td>
</tr>
</tbody>
</table>

SPECIFICATIONS

Audio section

- **THD+N:** ANALOG IN: 0.004 % (1 kHz)
- **S/N ratio:** ANALOG IN: 90 dB (Audible Range)
- **Frequency response:** 20 Hz to 20 kHz: ±0.5 dB

Wireless LAN section

- **Network type:** Conforming to IEEE 802.11a/b/g/n
- **Used frequency range:** 2.4 GHz, 5 GHz

General

- **Operating temperature:** 41 °F - 95 °F (5 °C - 35 °C)
- **Power supply:** AC 120 V, 60 Hz (for North America)
  AC 220 - 240 V, 50/60 Hz (for Europe)
- **Power consumption:** 20 W
- **Power consumption in network standby mode:** 4 W
- **Power consumption in deep standby mode:** 0.3 W
**Dimensions (Unit: in. (mm))**

![Dimensions Diagram]

**Weight: 2 lbs 13.9 oz (1.3 kg)**

License Information for the Software Used in the Unit

About GPL (GNU-General Public License), LGPL (GNU Lesser General Public License) License
This product uses GPL/LGPL software and software made by other companies.

After you purchase this product, you may procure, modify or distribute the source code of the GPL/LGPL software that is used in the product. Denon provides the source code based on the GPL and LPGL licenses at the actual cost upon your request to our customer service center. However, note that we make no guarantees concerning the source code. Please also understand that we do not offer support for the contents of the source code.

This section describes software license used for this unit. To maintain the correct content, the original (English) is used.
